ELSEVIER

Chemical Physics 184 (1994) 382–391

Chemical Physics

Subject index to volume 184

Methods

Theoretical

Many body and quasiparticle approaches

The vibrational and temperature dependence of the magnetic properties of the oxonium ion (H_3O^+), S.P.A. Sauer, V. Špirko, I. Paidarová and J. Oddershede 184 (1994) 1

Electron momentum distributions and ionization energy spectra of boron trifluoride, E. Weigold, Y. Zheng and W. von Niessen 184 (1994) 13

Coupling schemes and perturbative treatments

An intermolecular potential for $(O_2)_2$ involving $O_2(^1\Delta_g)$, B. Bussery 184 (1994) 29

Equilibrium statistical mechanics

Sequential and superexchange electron-transfer reactions in a three-component system, J. Tang 184 (1994) 39

Ab initio schemes for stationary properties

The vibrational and temperature dependence of the magnetic properties of the oxonium ion (H_3O^+), S.P.A. Sauer, V. Špirko, I. Paidarová and J. Oddershede 184 (1994) 1

Formation of NH_4^+ at the Brønsted site in SAPO catalysts, J. Limtrakul and J. Yoinuan 184 (1994) 51

A theoretical description of the ion BeC^+ and the photoelectron spectrum of BeC, A.C. Borin and F.R. Ornellas 184 (1994) 59

Quantum chemical investigation of the Ar–HCl interaction potential. Steepness and asymmetry with implications for energy transfer, M. Simonson, T.D. Sewell, S. Nordholm and A. Miklavc 184 (1994) 67

Theoretical study of the mono- and di-hydrated divalent ions of the first-row transition metals, R. Åkesson and L.G.M. Petterson 184 (1994) 85

Potential energy surfaces of some low-lying states of fluoroformyl radical FCO, S. Nanbu, M. Gomyo and S. Iwata 184 (1994) 97

Theoretical study of spectroscopic properties of cubane, V. Galasso 184 (1994) 107

Theoretical investigation of potential energy surfaces relevant for excited-state hydrogen transfer in *o*-hydroxybenzaldehyde, A.L. Sobolewski and W. Domcke 184 (1994) 115

On the evolution of cluster to bulk properties: a theoretical LCGTO-LDF study of free and coordinated Ni_n clusters ($n=6$–147), G. Pacchioni, S.-C. Chung, S. Krüger and N. Rösch 184 (1994) 125

Computational and simulation methods
Formation of NH_4^+ at the Brønsted site in SAPO catalysts, J. Limtrakul and J. Yoinuan 184 (1994) 51
π-electron force field in internal coordinates for trans- and cis-polyacetylene, A. Girlando, A. Painelli, G.W. Hayden and Z.G. Soos 184 (1994) 139
Spectroscopic and theoretical studies on a three-iron cluster with linear arrangement, H. Paulsen, X.-Q. Ding, M. Grodzicki, Ch. Butzlaff, A.X. Trautwein, R. Hartung and K. Wieghardt 184 (1994) 149
A smooth truncation for polarizable water, B.J. Palmer 184 (1994) 163
The theory of the diffusion-controlled reaction $A+B\rightarrow 0$ with arbitrary concentrations of reagents, M.G. Golubkov, A.S. Prostnev and B.R. Shub 184 (1994) 171

Molecular dynamics and scattering theory
Sequential and superexchange electron-transfer reactions in a three-component system, J. Tang 184 (1994) 39
Ion–molecule processes in the interstellar medium. Rates for rotational excitations in NH_3–H^+ collisions, F.A. Gianturco and F. Ragnetti 184 (1994) 177
A generalized Langevin equation for wave functions. Intramolecular vibrational dephasing as a stochastic process, K. Someda and R.D. Levine 184 (1994) 187
Differential photoionization cross section calculations for H_2S using the random phase approximation with L^2 basis functions, I. Cacelli, V. Carravetta and R. Moccia 184 (1994) 213

Experimental

Infrared spectroscopy
π-electron force field in internal coordinates for trans- and cis-polyacetylene, A. Girlando, A. Painelli, G.W. Hayden and Z.G. Soos 184 (1994) 139
A far infrared study of benzene–fluorinated benzene binary mixtures, T. Tassaing, Y. Danten, M. Besnard, E. Zoïdis and J. Yarwood 184 (1994) 225

Visible and UV spectroscopy
Tentative identification of C_5N_2 in rare gas matrices, A.M. Smith, C. Engel, A. Thoma, G. Schallmoser, B.E. Wurfel and V.E. Bondybey 184 (1994) 233
Exciton–phonon coupling and pressure-induced structural phase changes in coronene crystals, T. Yamamoto, S. Nakatani, T. Nakamura, K. Mizuno, A.H. Matsui, Y. Akahama and H. Kawamura 184 (1994) 247
Excited states of azo compounds. II. Vibrational structure of the electronic absorption spectra of 4,4′-di-substituted azobenzene derivatives, S. Luňák Jr., M. Nepraš, R. Hrdina and H. Mustroph 184 (1994) 255
Dual phosphorescence from 2-(2′-hydroxyphenyl)benzoxazole in amorphous solid solution. Temperature dependence of dispersive kinetics of nonexponential triplet decay, B. Nickel and A.A. Ruth 184 (1994) 261

Fluorescence spectroscopy
Tentative identification of C_5N_2 in rare gas matrices, A.M. Smith, C. Engel, A. Thoma, G. Schallmoser, B.E. Wurfel and V.E. Bondybey 184 (1994) 233
Excitation transfer for Xe^* $(^3P_2)+N_2$ in the eV energy range: double potential crossing for N_2 $(B, v'=5)$, T.G. Aardema, E.J. van Nijnatten and H.C.W. Beijerinck 184 (1994) 273

Photoelectron and Auger spectroscopy
A theoretical description of the ion BeC^+ and the photoelectron spectrum of BeC, A.C. Borin and F.R. Ornellas 184 (1994) 59

Electron impact spectroscopy
Electron momentum distributions and ionization energy spectra of boron trifluoride, E. Weigold, Y. Zheng and W. von Niessen 184 (1994) 13
Valence-shell electronic structures of cis- and trans-butene: ionic-state-resolved orientationally averaged electron momentum densities by symmetric noncoplanar (e, 2e) spectroscopy, C.P. Mathers, J.F. Ying, B.N. Gover and K.T. Leung 184 (1994) 295

Laser methods
Tentative identification of C_5N_2 in rare gas matrices, A.M. Smith, C. Engel, A. Thoma, G. Schallmoser, B.E. Wurfel and V.E. Bondybey 184 (1994) 233
Charge-transfer production of predissociated N_2 states. I. The $n=3$ Rydberg state region (12.8–14 eV), A.B. van der Kamp, P.C. Cosby and W.J. van der Zande 184 (1994) 319
Kinetics of multiphoton excitation and fragmentation of C_{60}, P. Wurz and K.R. Lykke 184 (1994) 335
Spectral hole-burning and Stark effect: frequency dependence of the induced dipole moment of a squaraine dye in polymers, E. Vauthey, J. Voss, C. de Caro, A. Renn and U.P. Wild 184 (1994) 347

Multiple resonance spectroscopy
Resonant two-photon ionization detection of atomic iodine resulting from photodissociation of allyl iodide under vibrational (C–H overtone) excitation, A.V. Baklanov, V.P. Maltsev, L. Karlsson, B. Lindgren and U. Sassenberg 184 (1994) 357

Atomic and molecular beam techniques
Excitation transfer for Xe^* $(^3\Sigma_2)+N_2$ in the eV energy range: double potential crossing for N^2 $(B, v'=5)$, T.G. Aardema, E.J. van Nijnatten and H.C.W. Beijerinck 184 (1994) 273
Charge-transfer production of predissociated N_2 states. I. The $n=3$ Rydberg state region (12.8–14 eV), A.B. van der Kamp, P.C. Cosby and W.J. van der Zande 184 (1994) 319

Time-resolved experiments
Resonant two-photon ionization detection of atomic iodine resulting from photodissociation of allyl iodide under vibrational (C–H overtone) excitation, A.V. Baklanov, V.P. Maltsev, L. Karlsson, B. Lindgren and U. Sassenberg 184 (1994) 357
Positronium solvation sites in liquid amides revealed by magnetic field effects: influence of the chemical structure of the molecules, I. Billard, J.Ch. Abbé and G. Duplâtre 184 (1994) 365
Characteristics of a positronium bound state with nitrobenzene in methanol as deduced from magnetic field effects at various temperatures, G. Duplâtre, I. Billard and J.Ch. Abbé 184 (1994) 371

Mass spectrometry
Kinetics of multiphoton excitation and fragmentation of C_{60}, P. Wurz and K.R. Lykke 184 (1994) 335

Mössbauer spectroscopy
Spectroscopic and theoretical studies on a three-iron cluster with linear arrangement, H. Paulsen, X.-Q. Ding, M. Grodzicki, Ch. Butzlaff, A.X. Trautwein, R. Hartung and K. Wieghardt 184 (1994) 149

X-ray, electron and neutron diffraction
Exciton–phonon coupling and pressure-induced structural phase changes in coronene crystals, T. Yamamoto, S. Nakatani, T. Nakamura, K. Mizuno, A.H. Matsui, Y. Akahama and H. Kawamura 184 (1994) 247

Field emission and field ionization
New model of charge carrier photogeneration for poly(N-vinylcarbazole), V. Cimrová and S. Nešpůrek 184 (1994) 283

Objects

Bulk systems

Gases
Quantum chemical investigation of the Ar–HCl interaction potential. Steepness and asymmetry with implications for energy transfer, M. Simonson, T.D. Sewell, S. Nordholm and A. Miklavc 184 (1994) 67
Ion–molecule processes in the interstellar medium. Rates for rotational excitations in NH_3–H^+ collisions, F.A. Gianturco and F. Ragnetti 184 (1994) 177
Valence-shell electronic structures of cis- and trans-butene: ionic-state-resolved orientationally averaged electron momentum densities by symmetric noncoplanar (e, 2e) spectroscopy, C.P. Mathers, J.F. Ying, B.N. Gover and K.T. Leung 184 (1994) 295

Liquids neat
A smooth truncation for polarizable water, B.J. Palmer 184 (1994) 163
Positronium solvation sites in liquid amides revealed by magnetic field effects: influence of the chemical structure of the molecules, I. Billard, J.Ch. Abbé and G. Duplâtre 184 (1994) 365

Liquids mixtures and solutions
A far infrared study of benzene–fluorinated benzene binary mixtures, T. Tassaing, Y. Danten, M. Besnard, E. Zoïdis and J. Yarwood 184 (1994) 225
Excited states of azo compounds. II. Vibrational structure of the electronic absorption spectra of 4,4′-di-substituted azobenzene derivatives, S. Luňák Jr., M. Nepraš, R. Hrdina and H. Mustroph 184 (1994) 255
Characteristics of a positronium bound state with nitrobenzene in methanol as deduced from magnetic field effects at various temperatures, G. Duplâtre, I. Billard and J.Ch. Abbé 184 (1994) 371

Crystals

–neat
Exciton–phonon coupling and pressure-induced structural phase changes in coronene crystals, T. Yamamoto, S. Nakatani, T. Nakamura, K. Mizuno, A.H. Matsui, Y. Akahama and H. Kawamura 184 (1994) 247

Glasses
Excited states of azo compounds. II. Vibrational structure of the electronic absorption spectra of 4,4′-di-substituted azobenzene derivatives, S. Luňák Jr., M. Nepraš, R. Hrdina and H. Mustroph 184 (1994) 255

Dual phosphorescence from 2-(2′-hydroxyphenyl)benzoxazole in amorphous solid solution. Temperature dependence of dispersive kinetics of nonexponential triplet decay, B. Nickel and A.A. Ruth 184 (1994) 261

Polymers

New model of charge carrier photogeneration for poly(N-vinylcarbazole), V. Cimrová and S. Nešpůrek 184 (1994) 283

Spectral hole-burning and Stark effect: frequency dependence of the induced dipole moment of a squaraine dye in polymers, E. Vauthey, J. Voss, C. de Caro, A. Renn and U.P. Wild 184 (1994) 347

Thin films

New model of charge carrier photogeneration for poly(N-vinylcarbazole), V. Cimrová and S. Nešpůrek 184 (1994) 283

Surfaces

The theory of the diffusion-controlled reaction $A+B\rightarrow 0$ with arbitrary concentrations of reagents, M.G. Golubkov, A.S. Prostnev and B.R. Shub 184 (1994) 171

Biological systems

Sequential and superexchange electron-transfer reactions in a three-component system, J. Tang 184 (1994) 39

Microscopic systems

Atoms

Excitation transfer for Xe^* ($^3P_2$) + N_2 in the eV energy range: double potential crossing for N_2 (B, $v'=5$), T.G. Aardema, E.J. van Nijnatten and H.C.W. Beijerinck 184 (1994) 273

Resonant two-photon ionization detection of atomic iodine resulting from photodissociation of allyl iodide under vibrational (C–H overtone) excitation, A.V. Baklanov, V.P. Maltsev, L. Karlsson, B. Lindgren and U. Sassenberg 184 (1994) 357

Molecules (neutral and ionic)

Theoretical study of the mono- and di-hydrated divalent ions of the first-row transition metals, R. Åkesson and L.G.M. Petterson 184 (1994) 85

A smooth truncation for polarizable water, B.J. Palmer 184 (1994) 163

Ion–molecule processes in the interstellar medium. Rates for rotational excitations in NH_3–H^+ collisions, F.A. Gianturco and F. Ragnetti 184 (1994) 177

A generalized Langevin equation for wave functions. Intramolecular vibrational dephasing as a stochastic process, K. Someda and R.D. Levine 184 (1994) 187

–diatomic

A theoretical description of the ion BeC^+ and the photoelectron spectrum of BeC, A.C. Borin and F.R. Ornellas 184 (1994) 59

Charge-transfer production of predissociated N_2 states. I. The $n=3$ Rydberg state region (12.8–14 eV), A.B. van der Kamp, P.C. Cosby and W.J. van der Zande 184 (1994) 319

–small polyatomics

The vibrational and temperature dependence of the magnetic properties of the oxonium ion (H_3O^+), S.P.A. Sauer, V. Špirko, I. Paidarová and J. Oddershede 184 (1994) 1

Electron momentum distributions and ionization energy spectra of boron trifluoride, E. Weigold, Y. Zheng and W. von Niessen 184 (1994) 13

Theoretical study of the mono- and di-hydrated divalent ions of the first-row transition metals, R. Åkesson and L.G.M. Petterson 184 (1994) 85

Theoretical study of spectroscopic properties of cubane, V. Galasso 184 (1994) 107

Differential photoionization cross section calculations for H_2S using the random phase approximation with L^2 basis functions, I. Cacelli, V. Carravetta and R. Moccia 184 (1994) 213

Valence-shell electronic structures of cis- and trans-butene: ionic-state-resolved orientationally averaged electron momentum densities by symmetric noncoplanar (e, 2e) spectroscopy, C.P. Mathers, J.F. Ying, B.N. Gover and K.T. Leung 184 (1994) 295

Resonant two-photon ionization detection of atomic iodine resulting from photodissociation of allyl iodide under vibrational (C–H overtone) excitation, A.V. Baklanov, V.P. Maltsev, L. Karlsson, B. Lindgren and U. Sassenberg 184 (1994) 357

Positronium solvation sites in liquid amides revealed by magnetic field effects: influence of the chemical structure of the molecules, I. Billard, J.Ch. Abbé and G. Duplâtre 184 (1994) 365

–aromatics

Theoretical investigation of potential energy surfaces relevant for excited-state hydrogen transfer in *o*-hydroxybenzaldehyde, A.L. Sobolewski and W. Domcke 184 (1994) 115

Exciton–phonon coupling and pressure-induced structural phase changes in coronene crystals, T. Yamamoto, S. Nakatani, T. Nakamura, K. Mizuno, A.H. Matsui, Y. Akahama and H. Kawamura 184 (1994) 247

Excited states of azo compounds. II. Vibrational structure of the electronic absorption spectra of 4,4′-di-substituted azobenzene derivatives, S. Luňák Jr. , M. Nepraš, R. Hrdina and H. Mustroph 184 (1994) 255

Dual phosphorescence from 2-(2′-hydroxyphenyl)benzoxazole in amorphous solid solution. Temperature dependence of dispersive kinetics of nonexponential triplet decay, B. Nickel and A.A. Ruth 184 (1994) 261

Kinetics of multiphoton excitation and fragmentation of C_{60}, P. Wurz and K.R. Lykke 184 (1994) 335

Spectral hole-burning and Stark effect: frequency dependence of the induced dipole moment of a squaraine dye in polymers, E. Vauthey, J. Voss, C. de Caro, A. Renn and U.P. Wild 184 (1994) 347

–other large

Spectroscopic and theoretical studies on a three-iron cluster with linear arrangement, H. Paulsen, X.-Q. Ding, M. Grodzicki, Ch. Butzlaff, A.X. Trautwein, R. Hartung and K. Wieghardt 184 (1994) 149

A generalized Langevin equation for wave functions. Intramolecular vibrational dephasing as a stochastic process, K. Someda and R.D. Levine 184 (1994) 187

Tentative identification of C_5N_2 in rare gas matrices, A.M. Smith, C. Engel, A. Thoma, G. Schallmoser, B.E. Wurfel and V.E. Bondybey 184 (1994) 233

–polymeric and biological

π-electron force field in internal coordinates for trans- and cis-polyacetylene, A. Girlando, A. Painelli, G.W. Hayden and Z.G. Soos 184 (1994) 139

Molecular aggregates
Formation of NH_4^+ at the Brønsted site in SAPO catalysts, J. Limtrakul and J. Yoinuan 184 (1994) 51

–dimers
An intermolecular potential for $(O_2)_2$ involving $O_2(^1\Delta_g)$, B. Bussery 184 (1994) 29

–van der Waals molecules
An intermolecular potential for $(O_2)_2$ involving $O_2(^1\Delta_g)$, B. Bussery 184 (1994) 29
Quantum chemical investigation of the Ar–HCl interaction potential. Steepness and asymmetry with implications for energy transfer, M. Simonson, T.D. Sewell, S. Nordholm and A. Miklavc 184 (1994) 67
A far infrared study of benzene–fluorinated benzene binary mixtures, T. Tassaing, Y. Danten, M. Besnard, E. Zoïdis and J. Yarwood 184 (1994) 225

–clusters
On the evolution of cluster to bulk properties: a theoretical LCGTO-LDF study of free and coordinated Ni_n clusters (n=6–147), G. Pacchioni, S.-C. Chung, S. Krüger and N. Rösch 184 (1994) 125

Free radicals (including hydronium and muonium)
Potential energy surfaces of some low-lying states of fluoroformyl radical FCO, S. Nanbu, M. Gomyo and S. Iwata 184 (1994) 97
Characteristics of a positronium bound state with nitrobenzene in methanol as deduced from magnetic field effects at various temperatures, G. Duplâtre, I. Billard and J.Ch. Abbé 184 (1994) 371

Ions and charge carriers
Ion–molecule processes in the interstellar medium. Rates for rotational excitations in NH_3–H^+ collisions , F.A. Gianturco and F. Ragnetti 184 (1994) 177

Phenomena

Molecular structure
An intermolecular potential for $(O_2)_2$ involving $O_2(^1\Delta_g)$, B. Bussery 184 (1994) 29
Formation of NH_4^+ at the Brønsted site in SAPO catalysts, J. Limtrakul and J. Yoinuan 184 (1994) 51
Theoretical study of the mono- and di-hydrated divalent ions of the first-row transition metals, R. Åkesson and L.G.M. Petterson 184 (1994) 85

Vibrations and rotations of molecules
The vibrational and temperature dependence of the magnetic properties of the oxonium ion (H_3O^+), S.P.A. Sauer, V. Špirko, I. Paidarová and J. Oddershede 184 (1994) 1
π-electron force field in internal coordinates for trans- and cis-polyacetylene, A. Girlando, A. Painelli, G.W. Hayden and Z.G. Soos 184 (1994) 139
Tentative identification of C_5N_2 in rare gas matrices, A.M. Smith, C. Engel, A. Thoma, G. Schallmoser, B.E. Wurfel and V.E. Bondybey 184 (1994) 233
Excitation transfer for Xe^* ($^3P_2$) + N_2 in the eV energy range: double potential crossing for N_2(B, v'=5), T.G. Aardema, E.J. van Nijnatten and H.C.W. Beijerinck 184 (1994) 273

Electronic structure and states

Electron momentum distributions and ionization energy spectra of boron trifluoride, E. Weigold, Y. Zheng and W. von Niessen 184 (1994) 13

An intermolecular potential for $(O_2)_2$ involving $O_2(^1\Delta_g)$, B. Bussery 184 (1994) 29

A theoretical description of the ion BeC^+ and the photoelectron spectrum of BeC, A.C. Borin and F.R. Ornellas 184 (1994) 59

Potential energy surfaces of some low-lying states of fluoroformyl radical FCO, S. Nanbu, M. Gomyo and S. Iwata 184 (1994) 97

Theoretical study of spectroscopic properties of cubane, V. Galasso 184 (1994) 107

π-electron force field in internal coordinates for trans- and cis-polyacetylene, A. Girlando, A. Painelli, G.W. Hayden and Z.G. Soos 184 (1994) 139

Spectroscopic and theoretical studies on a three-iron cluster with linear arrangement, H. Paulsen, X.-Q. Ding, M. Grodzicki, Ch. Butzlaff, A.X. Trautwein, R. Hartung and K. Wieghardt 184 (1994) 149

Excited states of azo compounds. II. Vibrational structure of the electronic absorption spectra of 4,4′-di-substituted azobenzene derivatives, S. Luňák Jr. , M. Nepraš, R. Hrdina and H. Mustroph 184 (1994) 255

Excitation transfer for Xe^* $(^3P_2) + N_2$ in the eV energy range: double potential crossing for N_2 $(B, v'=5)$, T.G. Aardema, E.J. van Nijnatten and H.C.W. Beijerinck 184 (1994) 273

Valence-shell electronic structures of cis- and trans-butene: ionic-state-resolved orientationally averaged electron momentum densities by symmetric noncoplanar (e, 2e) spectroscopy, C.P. Mathers, J.F. Ying, B.N. Gover and K.T. Leung 184 (1994) 295

Charge-transfer production of predissociated N_2 states. I. The $n=3$ Rydberg state region (12.8–14 eV), A.B. van der Kamp, P.C. Cosby and W.J. van der Zande 184 (1994) 319

Electric and magnetic properties

The vibrational and temperature dependence of the magnetic properties of the oxonium ion (H_3O^+), S.P.A. Sauer, V. Špirko, I. Paidarová and J. Oddershede 184 (1994) 1

On the evolution of cluster to bulk properties: a theoretical LCGTO-LDF study of free and coordinated Ni_n clusters $(n=6–147)$, G. Pacchioni, S.-C. Chung, S. Krüger and N. Rösch 184 (1994) 125

Spectroscopic and theoretical studies on a three-iron cluster with linear arrangement, H. Paulsen, X.-Q. Ding, M. Grodzicki, Ch. Butzlaff, A.X. Trautwein, R. Hartung and K. Wieghardt 184 (1994) 149

New model of charge carrier photogeneration for poly(N-vinylcarbazole), V. Cimrová and S. Nešpůrek 184 (1994) 283

Molecular interactions

Formation of NH_4^+ at the Brønsted site in SAPO catalysts, J. Limtrakul and J. Yoinuan 184 (1994) 51

Quantum chemical investigation of the Ar–HCl interaction potential. Steepness and asymmetry with implications for energy transfer, M. Simonson, T.D. Sewell, S. Nordholm and A. Miklavc 184 (1994) 67

A far infrared study of benzene–fluorinated benzene binary mixtures, T. Tassaing, Y. Danten, M. Besnard, E. Zoïdis and J. Yarwood 184 (1994) 225

Spectral bandshapes and intensities

A far infrared study of benzene–fluorinated benzene binary mixtures, T. Tassaing, Y. Danten, M. Besnard, E. Zoïdis and J. Yarwood 184 (1994) 225

Energy transfer processes
Quantum chemical investigation of the Ar–HCl interaction potential. Steepness and asymmetry with implications for energy transfer, M. Simonson, T.D. Sewell, S. Nordholm and A. Miklavc 184 (1994) 67
Ion–molecule processes in the interstellar medium. Rates for rotational excitations in NH_3–H^+ collisions, F.A. Gianturco and F. Ragnetti 184 (1994) 177

Molecular photophysical processes
A theoretical description of the ion BeC^+ and the photoelectron spectrum of BeC, A.C. Borin and F.R. Ornellas 184 (1994) 59
Potential energy surfaces of some low-lying states of fluoroformyl radical FCO, S. Nanbu, M. Gomyo and S. Iwata 184 (1994) 97
Theoretical investigation of potential energy surfaces relevant for excited-state hydrogen transfer in *o*-hydroxybenzaldehyde, A.L. Sobolewski and W. Domcke 184 (1994) 115
Dual phosphorescence from 2-(2′-hydroxyphenyl)benzoxazole in amorphous solid solution. Temperature dependence of dispersive kinetics of nonexponential triplet decay, B. Nickel and A.A. Ruth 184 (1994) 261
Spectral hole-burning and Stark effect: frequency dependence of the induced dipole moment of a squaraine dye in polymers, E. Vauthey, J. Voss, C. de Caro, A. Renn and U.P. Wild 184 (1994) 347

Intramolecular dynamics

–radiationless transitions
Theoretical investigation of potential energy surfaces relevant for excited-state hydrogen transfer in *o*-hydroxybenzaldehyde, A.L. Sobolewski and W. Domcke 184 (1994) 115

–vibrational energy redistribution (including vibrational dissociation)
A generalized Langevin equation for wave functions. Intramolecular vibrational dephasing as a stochastic process, K. Someda and R.D. Levine 184 (1994) 187
Resonant two-photon ionization detection of atomic iodine resulting from photodissociation of allyl iodide under vibrational (C–H overtone) excitation, A.V. Baklanov, V.P. Maltsev, L. Karlsson, B. Lindgren and U. Sassenberg 184 (1994) 357

Luminescence spectra, yields and lifetimes
Exciton–phonon coupling and pressure-induced structural phase changes in coronene crystals, T. Yamamoto, S. Nakatani, T. Nakamura, K. Mizuno, A.H. Matsui, Y. Akahama and H. Kawamura 184 (1994) 247

Multiphoton phenomena
Kinetics of multiphoton excitation and fragmentation of C_{60}, P. Wurz and K.R. Lykke 184 (1994) 335

Reactions (including dissociation)

–condensed phase
Positronium solvation sites in liquid amides revealed by magnetic field effects: influence of the chemical structure of the molecules, I. Billard, J.Ch. Abbé and G. Duplâtre 184 (1994) 365
Characteristics of a positronium bound state with nitrobenzene in methanol as deduced from magnetic field effects at various temperatures, G. Duplâtre, I. Billard and J.Ch. Abbé 184 (1994) 371

Electron transfer
Sequential and superexchange electron-transfer reactions in a three-component system, J. Tang 184 (1994) 39

Positron annihilation
Positronium solvation sites in liquid amides revealed by magnetic field effects: influence of the chemical structure of the molecules, I. Billard, J.Ch. Abbé and G. Duplâtre 184 (1994) 365
Characteristics of a positronium bound state with nitrobenzene in methanol as deduced from magnetic field effects at various temperatures, G. Duplâtre, I. Billard and J.Ch. Abbé 184 (1994) 371

Ionization (including Rydberg states)
Differential photoionization cross section calculations for H_2S using the random phase approximation with L^2 basis functions, I. Cacelli, V. Carravetta and R. Moccia 184 (1994) 213
Valence-shell electronic structures of cis- and trans-butene: ionic-state-resolved orientationally averaged electron momentum densities by symmetric noncoplanar (e, 2e) spectroscopy, C.P. Mathers, J.F. Ying, B.N. Gover and K.T. Leung 184 (1994) 295
Kinetics of multiphoton excitation and fragmentation of C_{60}, P. Wurz and K.R. Lykke 184 (1994) 335

Molecular motion (including diffusive)
The theory of the diffusion-controlled reaction $A+B\rightarrow 0$ with arbitrary concentrations of reagents, M.G. Golubkov, A.S. Prostnev and B.R. Shub 184 (1994) 171

Surface effects and catalysis
On the evolution of cluster to bulk properties: a theoretical LCGTO-LDF study of free and coordinated Ni_n clusters ($n=6$–147), G. Pacchioni, S.-C. Chung, S. Krüger and N. Rösch 184 (1994) 125
